WORK EXPERIENCE

Brightfunnel

July 2016 - Present

BrightFunnel is a B2B marketing attribution and forecasting SaaS company that gives marketers powerful insights to marketing's impact on revenue.

UI Developer

- 1 of 3 members on the front-end engineering team. Responsibilities include developing front-end code and UI components for new product features as well as maintaining and modularizing the current codebase.
- Solely responsible for the redesign and implementation of the global filters feature as well as the development of the app's new navigation user interface. I developed these features using HTML/CSS/LESS, Github and JavaScript/AngularJS.
- 1 of 3 members to implement a dashboard feature using JavaScript and AngularJS.
- Utilize knowledge of UI/UX and design principles to create wireframes for application features using Balsamiq.
- Thrive in a fast-paced environment from developing in an agile 2 week sprints.

Levanto Financial

Jun 2015 - Sept 2015

Levanto Financial is a household CFO service that helps users make financial decisions with confidence.

Graphic Design Intern

- Exhibited UI & design skills through creating the chat feature of the mobile app using Adobe Photoshop.
- Created marketing graphics with Adobe Illustrator.

EDUCATION

Santa Clara University  
2012-2016

B.S. Web Design & Engineering  
Minor in Mathematics  
Cum Laude

PROJECTS

Brightfunnel

Global Filters Redesign

- Solely responsible for this project
- Designed wireframes and workflows for the global filters feature using Balasmiq.
- Collaborated with product and customer success team to acquire feedback about design.
- Once the design was finalized, I developed the UI using HTML/LESS and the logic using AngularJS.

New Navigation Development

- Developed the new navigation's UI and logic for the application using HTML/LESS and AngularJS.
- Used angular ui-router to develop the routes
- Created a walk-through guide for the new feature using Pendo
- Worked with customer success team to release the new navigation
